I learned how to deal with many kind of people from multiple industries with different personality. I also learn how to organized many kind activities and meetings during the time I work as a TA of my professors. So I believe that I am qualify to apply this job and can done a good job. I always pay a lot of attention / am very careful with my duty of doing everything. Also, I am full of surprise, I can always satisfy my boss and moreover, done a even better job than my professors asked me to do. I always tried my best to work hard and do a "perfect job". I also know how to have a good relationship with my co-workers or boss cause I am always willing to take advises or suggestion that will help me achieve a greater work or better efficient. When comes to discussion, I can always offer a suggestion to my crew, although my idea might not be the best, but me and my crew can always fixed the others suggestion and come out with a edited, better version that we all agree with. I am always willing to learn from the others or learn from experience.

I hope that I can have the chance to work for this company and also learning a lot of things from the company, It will be my pleasure.
